Performance Study of Mobile Ipv6 Using Opnet Simulator Mobile communication is increasingly oriented towards the usage of all Internet Protocol (IP) networks as fixed network components. Mobility support for Internet devices is quite important for consumer electronics and the number of the handled device is growing up quickly. However, the IP addresses are not enough for the number of the rapidly grow devices in the All-IP generation. So the Internet Protocol Version Six (IPv6) is adopted to solve these problems. Mobile IP technology is one of the important supporting technical in the construction of pervasive computing environment. This book is a study of the Mobile IPv6 issues using OPNET IPv6 model. Mobile IP...
